

Information regarding Investment in Mutual Funds

Asset Management Companies (AMCs) are mandated by SEBI to risk rate their respective schemes. The aim is to help investors understand and assess the risks involved in investing in a particular mutual fund scheme.

The depiction of the risk by the AMCs is done through a Risk-o-meter that represents 6 different risk categories as follows:

Risk Level	Suitable For	Investor Profile
Low	Conservative	Investor is willing to accept minimal risks and hence, might receive minimum or no returns.
Low to Moderate	Moderately Conservative	Investor is willing to accept small level of risk in exchange for some potential returns over the medium to long term.
Moderate	Moderate	Investor can tolerate moderate level of risk in exchange for relatively higher potential returns over the medium to long term.
Moderately High	Moderately Aggressive	Investor is keen to accept higher level of risk in order to maximize potential returns over the medium to long term
High	Aggressive	Investor is willing to accept significant risks to maximize potential returns over the long term and is aware that he/she may lose all or significant part of capital.
Very High	Very Aggressive	Investor is willing to accept very high risks to maximize potential returns over the long term and is aware that he/she may lose all/ significant part of capital.

Effective January 01, 2021, the Risk-o-meter has been applied to all the existing schemes and all schemes to be launched on or thereafter. We request you to refer to the Risk-o-meter in the scheme documents and understand the risk of the scheme to decide whether the investments will suit your risk profile.
